December 2011

Dear Fordyce Redbug:

I hope you had a good Thanksgiving. I'm sure you're like me...blessed, but don't know when to stop eating all that bless_ed food!

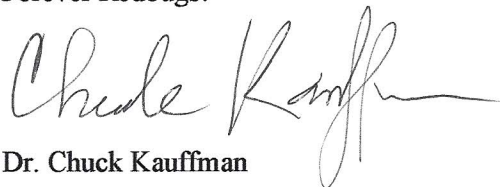

This is a friendly reminder from the Board of the Fordyce Redbug Alumni Foundation to please remember FRAF again this year. We are still in the business for one reason: to make our Alma Mater the best it can be.

We are, yearly, having requests brought to us for help in "improving the classroom and beyond." The last two requests granted were from: 1) The Fordyce Middle School's Science Department for 3 soil sensors/analyzers and 4 microscopes, and 2) the EAST Computer Lab to help with presentations, whether they be to local civic clubs or to EAST state competitions held each spring. This assures EAST a chance to show and share in a more professional manner the projects they have taken on in helping the school and/or the City of Fordyce.

Also, let it be known that the designated monies that came in a few years back, specifically for improvements at Redbug Field, have been used to paint, spruce up and shore up the facilities there. Again, we do not delve into athletics needs and we do not direct monies that way unless the giver specifies it to be given to athletics. But, thank you to those who answered that need.

Have a good Christmas and New Year, and Go Bugs, Go Hogs!

Forever Redbugs!

Dr. Chuck Kauffman
